Product & Technical Support Information

Dear Distributors and Partners,

We are pleased to announce the release of JMobile Suite Version 1.60 (01). This is the Service Pack 1 of the JMobile Suite 1.60. The installation package is available for download from the JMobile web site at the following [link](#). Please note that the web page is accessible only to distributor class registered users.

The Service Pack can be considered a technical release and it does contain only bug fixes. As usual, the release notes of the version are available on the JMobile web site from the following [link](#). Release note page is already listing versions greater than 1.60.01.00. They refer to the incoming beta version of the 1.80 release. For now, they are only of interest for those that are somehow involved in the alpha and beta testing of the next release.

The JMobile web site also provides an FAQ section which is constantly updated with items related to newly implemented features (not yet described in the on-line help) or generic application notes, such as the use of the CoDeSys soft PLC for direct control of the panel serial port or the configuration of an IP camera for use with JMobile.

FAQ's are available from the following [link](#).

Regards

Simone MORI
